# ALUMINIUM ALLOY EN-AW 6060 (AlmgSi0,5)

Material data sheet

## Scope

Aluminium alloy 6060 is a medium strength heat treatable alloy with a strength slightly lower than 6005A. It has very good corrosion resistance, very good weldability and good cold formability. It is commonly used for complex cross sections and has very good anodizing response.

Alloy	Forms	Characteristics - Properties	Applications		
EN - AW 6060	Extruded round rod/bar	Very good corrosion resistance Medium strength Comlex sections Anodising quality	Architectural sections, frames, lightings, railling, ladders, furniture, fences, flooring		

Alloy	Tempers	Temper designation (EN 515)
	0	Annealed wrought alloys
	T4	Solution heat treated ® natural aged
0909	T5	Cooled from an elevated temperature forming operation ${\mathbb Q}$ artificially aged (precipitation hardened)
AW 6060	T6	Solution heat treated $\otimes$ artificially aged (precipitation hardened) Press quenching required
EN - 1	T64	Solution heat treated $\&$ artificially aged (precipitation hardened) Under aged to improve formability (bending temper)
	T66	Cooled from an elevated temperature forming operation $@$ artificially aged (precipitation hardened) to a higher level of mechanical properties through special control of manufacturing processes. Press quenching requierd.

## About Aluminco S.A.

Today, with 33 years of experience, our company has evolved to an integrated vertical aluminium industry focusing on developing, producing and marketing branded aluminium systems for every architectural use.

The extrusion department of Aluminco is the "heart" of the factory. Our unit is fully automated equipped with the latest software and hardware.

The advanced cooling system of our extrusion pres is fully automated, constantly controls the temperature of the extruded profile through air, keeping the appropriate cooling rate for each alloy and temper. The extrusion line is also equipped with automated stacker machine with no human contact eliminating the risk of damaging the extruded profile.

Finally the aging ovens are fully automated with continuous temperature control and real time adjustment, safeguarding the optimum temper results.

ALUMINCO headquarters, are located in Inofita Viotia, Greece, at a 40.000sq.m. owned property.
